All Clean Services

The Horniman Museum Conservatory

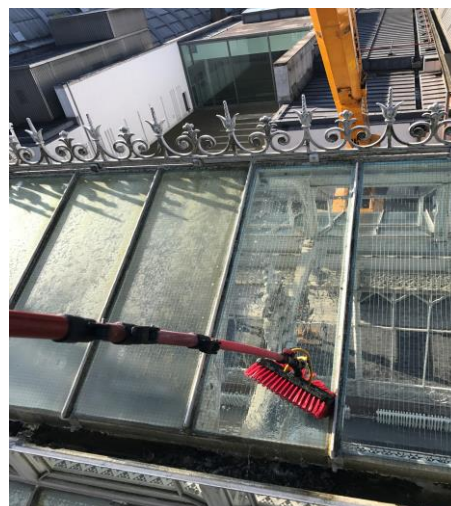

Background

Built in 1894, the Grade II listed Victorian Conservatory is a beautiful and unique glass structure, however it was in need of a thorough deep clean. Due to the unusual design of the building and the importance of not damaging the fragile glass, All Clean Services were the obvious choice to carry out this task.

Requirements

Because of the unique design of this building it was decided to use a lorry mounted cherry picker along with water fed poles

Results

After cleaning the glass was left sparkling and smear free and the building manager was delighted with the results.
